

Certificate – Rural Health

PHILOSOPHY:

The Rural Public Health Certificate is designed to give students an opportunity to explore Native community issues in a tribal college setting. The goal of this program is to educate students about healing individuals and communities using traditional and western approaches.

EXPECTED LEARNER OUTCOMES:

Students will:

1. explore intergenerational trauma and its effects on Native individuals and Native communities.
2. examine Native Cree practices to heal individuals.
3. learn about traditional Cree practices to work with and heal rural Indigenous communities.
4. practice western skills of communication and counseling.
5. understand the importance of case management in reservation settings.
